PROJECTS

- **Movie Recommendation System (IMDb Clone with AI Integration):**
  - Built a full-stack movie recommendation platform using Django and PostgreSQL.
  - Integrated TextBlob for sentiment analysis of user reviews to enhance personalization. Used DeepFace to capture facial expressions and suggest movies based on emotion.
  - Implemented TensorFlow-based models for collaborative and content-based filtering.
  - Designed a responsive front-end and efficiently managed movie metadata in the database.

- **CSV Filtering Tool:** Developed a web tool in Django and JavaScript for uploading, filtering, sorting, and exporting CSV data with a responsive front-end.

- **Food Donation Platform (**In Progress**):** Created a React-Django application connecting food donors to NGOs with secure login, donation tracking, and PostgreSQL-backed data management.
